1. Research the procedure and specifications for servicing the wheel bearings and locking hubs in the appropriate service information.
 - a. **List the specified wheel-bearing lubricant:** _____
 - b. **List or print off and attach to this sheet the procedure for adjusting the wheel bearings:**

2. Safely raise and support the vehicle on a hoist or jack stands.

3. Following the specified procedure, remove the locking hub(s) and wheel bearings (inner and outer). **List your observation(s):**

4. Following the specified procedure, disassemble the locking hub(s). Clean all parts in an environmentally safe way and re-inspect each components. **List your observation(s):**

NOTE There are various views on whether a wheel bearing should be cleaned with solvents, as it could leave solvent-laden grease in the bearing. See your instructor or the service information for the recommended procedure for cleaning and packing wheel bearings.

5. **Determine any necessary action(s):**

6. Have your supervisor/instructor verify satisfactory completion of this procedure, any observations found, and any necessary action(s) recommended.
